

## Internet Access

You have three possibilities to get internet access within the conference buildings. You can either use your personal laptop with **WLAN** or **LAN**, or you can go to a **computer terminal** in one of the computer pools in the buildings [HG](#) and [ML](#).

## Wireless LAN

### WLAN coverage

- Except for the [KO2](#), [KOL/KOH](#) buildings you will have WLAN access everywhere in all conference buildings. There are student workplaces (tables, power supply) all around—feel free to use them.
- There are working rooms in [KOL E18](#), [HG E23](#), [HG E26.1](#) and [HG E26.3](#) with WLAN access, power supply, a VPP printer and supervision (Monday to Thursday 09:30–18:00; Friday 09:30–14:00). Opening hours: 07:00–21:30.
- In the [KO2](#), [KOL/KOH](#) buildings WLAN access is provided only locally. Depending on the ongoing events, you can connect to WLAN at the following places: [KOL main hall \(Lichthof\)](#), [MEN \(cafeteria\)](#), or at the student workplaces in the university tower [KOL](#) (KOL K2-3, KOL K4, KOL L2, KOL L3).

### Connecting to WLAN

If you want to connect to the WLAN, you have two possibilities:

#### Connecting with VPN:

- Connect to the network with *ssid public*. If you do not know how to do this, please ask one of the supervisors in the computer pools (see the subsection on 'Computer Terminals' below).
- Start your VPN client and connect to your personal account (provided, e.g., by your

university). You will not need the ICIAM username / password.

#### Connecting without VPN:

- Connect to the network with *ssid public*. If you do not know how to do this, please ask one of the supervisors in the computer pools (see the subsection on 'Computer Terminals' below).
- Open any internet browser and type in the URL of your requested webpage. You will be automatically redirected to a page where you have to enter username and password to connect to the world wide web:
  - **User name:** `iciam07`
  - **Password:** `zurich2007`
- If you enter these authentication details correctly, you will get to the requested page and have access to the world wide web.

**Note:** Please understand that due to increased access requests during the main breaks, the WLAN resources might not be 100% reliable. If you have to rely on a very safe and stable internet connection, we recommend to use a LAN socket (see the next subsection).

## LAN

If you have your own laptop, you can use the LAN sockets that are available in the following rooms:

- HG, floor E:
  - [HG E19](#): 5 workplaces
  - [HG E27](#): 48 workplaces (upper level) + 10 workplaces (ground level)
- HG, floor H:
  - HG H26: 10 workplaces (reading room special collections of ETH library)
  - HG H29: 12 workplaces

# Internet Access, Printing, Power Supply

---

- HG H30: 26 workplaces (info center ETH library)

Using these connections you do not need to enter a username or password — they provide you with a direct and stable high speed connection to the world wide web. Close to the LAN sockets there are plugs for power supply (see the section on 'Power Supply' below).

## Computer Terminals

Several computer pools with MS Windows or Linux terminals and standard software (MATLAB, Mathematica, Maple, various editors, T<sub>E</sub>X, AdobeReader, MS Office, ...) are available. They are located in the following rooms:

- HG, floor E:
  - [HG E19](#): 42 terminals, MS Windows.
  - [HG E27](#): 20 terminals, MS Windows; 22 terminals, Linux.
- HG, floor D:
  - [HG D11](#): 19 terminals, MS Windows.
  - [HG D12](#): 21 terminals, MS Windows.
  - [HG D13](#): 13 terminals, Linux.
- ML, floor H:
  - [ML H34.1](#): 18 terminals, MS Windows.
  - [ML H41.2](#): 16 terminals, Linux.

To access the terminals in these rooms, you just need to enter the username and password provided separately at each computer terminal. The computer pools are open Monday - Friday, 07:00–21:30. Supervisors will be close by (Monday to Thursday, 09:30–18:00; Friday, 09:30–14:00). If you have any problems, feel free to ask them for help.

## Printing

You have two possibilities to print out documents. You can either use the VPP online form or go to one of the computer pools. Please refer to the ICIAM 07 Web page

[www.iciam07.ch/printing](http://www.iciam07.ch/printing)

on how to use the VPP form or to the leaflets within the computer pools.

## Power Supply

At most student workplaces you will find sockets for power supply. To use them, you need a corresponding adapter (depending on the country you are usually using your electronic device). The Swiss net provides you with 230 V at 50 Hz. You can use the three-pin sockets also with two-pin plugs. If you do not have an adapter, we recommend to buy one at an electronics shop or ask at your hotel reception. In really urgent cases, please contact a supervisor in [KOL E18](#), they have a small number of adapters in stock (to use only in [KOL E18](#)). There are some sockets for German plugs in [HG E26.1](#) and [HG E26.3](#).
